initiatives | Program Management | Data Science Initiatives
Bengaluru, Karnataka, India

Summary

Senior Business Excellence & Transformation professional with over 13 years of experience across Banking, Insurance and Consulting Companies. Certified Lean Six Sigma Black Belt, Project Manager and Data Scientist. I am passionate about solving the critical issues of the Banking industry, by applying technology and innovation. Being a certified PMP, with proven management skills, I have taken strategic decisions in challenging environment. Have led process reengineering teams including implementation of solutions like highly scaled RPA, Email analytics, process mining, AI/ML solutions leveraged Firm-wide using agile methodology to drive cost efficiencies

Experience

Deutsche Bank

4 years 9 months

Vice President, Front to Back Ops Transformation
March 2025 - Present (1 year 4 months)

I make global operations smarter, faster, and future-ready.

I've built the frameworks, governance structures, and KPIs that turn complex global programs into well-oiled machines. I've led AI/ML integration across Trade Finance and Cash Payments, cutting inefficiencies by 20%. From automating trade lifecycles for Rates and Credit Derivatives to streamlining KYC and client onboarding — I find the friction and eliminate it.

I build Looker dashboards that make data impossible to ignore, and I've led process discovery across ASL and Funds Services to standardize and automate at scale.

Operations is where strategy meets execution. That's where I thrive.
